Healthier Students and Environment. Efficient Buildings and Community

Dream in Green invites all public, private and charter schools to enroll in the Dream in Green Academy. The Academy is a platform that delivers innovative environmental education programs for K-12 schools. Students, teachers, administration staff and parents are encouraged to design and implement solutions to address environmental challenges in their school. Students become stewards of the environment by completing activities from classroom projects to community campaigns.

Schools receive a guidebook with clear guidelines on how to complete the program. Dream in Green staff offers support to help schools save energy

and conserve water, consequently reducing their carbon footprint and saving money on utility bills.

Dream in Green has been offering environmental education programs to K-12 schools since 2006. The Academy builds on the success of the Green Schools Challenge, DIG's flagship program, which started as a pilot in 3 schools and is now implemented in over 100 schools every year.

Applications for the 2018/2019 program are being accepted now for a limited time.

Program Features

FREE

- ✔ Support to schools and teachers through site visits, emails and e-newsletters.
- ✔ Master Plan points offered to MDCPS teachers who attend the professional development training in the Fall 2018.
- ✔ Successes are celebrated at the End-of-Year Awards Ceremony in June 2019.

The Benefits

- ✔ Reduce school's utility costs by becoming more energy and water efficient.
- ✔ Increase environmental literacy among program participants.
- ✔ Students develop leadership, teamwork and critical thinking skills.
- ✔ Empower students to make informed decisions about environmental issues.
