

Want to help fight global warming?

What is global warming doing?

More extreme weather events causing

- loss of life and destruction of homes
- Crop failure and famine
- Disappearance of rare plants and animals
- Rising of Sea levels because the Polar ice is melting

Why is this happening?

50,000,000,000 tons of polluting gas carbon dioxide is being produced every year by people. Because people are burning fossil fuels like oil, gas or coal, for example in cars, planes and electric power stations.

This is causing the climate to change.

We want you to help

We at the World Advanced Vehicle Expedition (WAVE)
want:

1,000,000 school children

In 100 coastal cities around the world

To commit to reduce their own CO₂ emissions!

The school children simply write their own commitment on a piece of paper of 8 x 12 cm and stick them on a larger paper size A0. These children will be from coastal cities such as Rio de Janeiro, Amsterdam, Sydney, San Francisco, Cape Town and Tokyo.

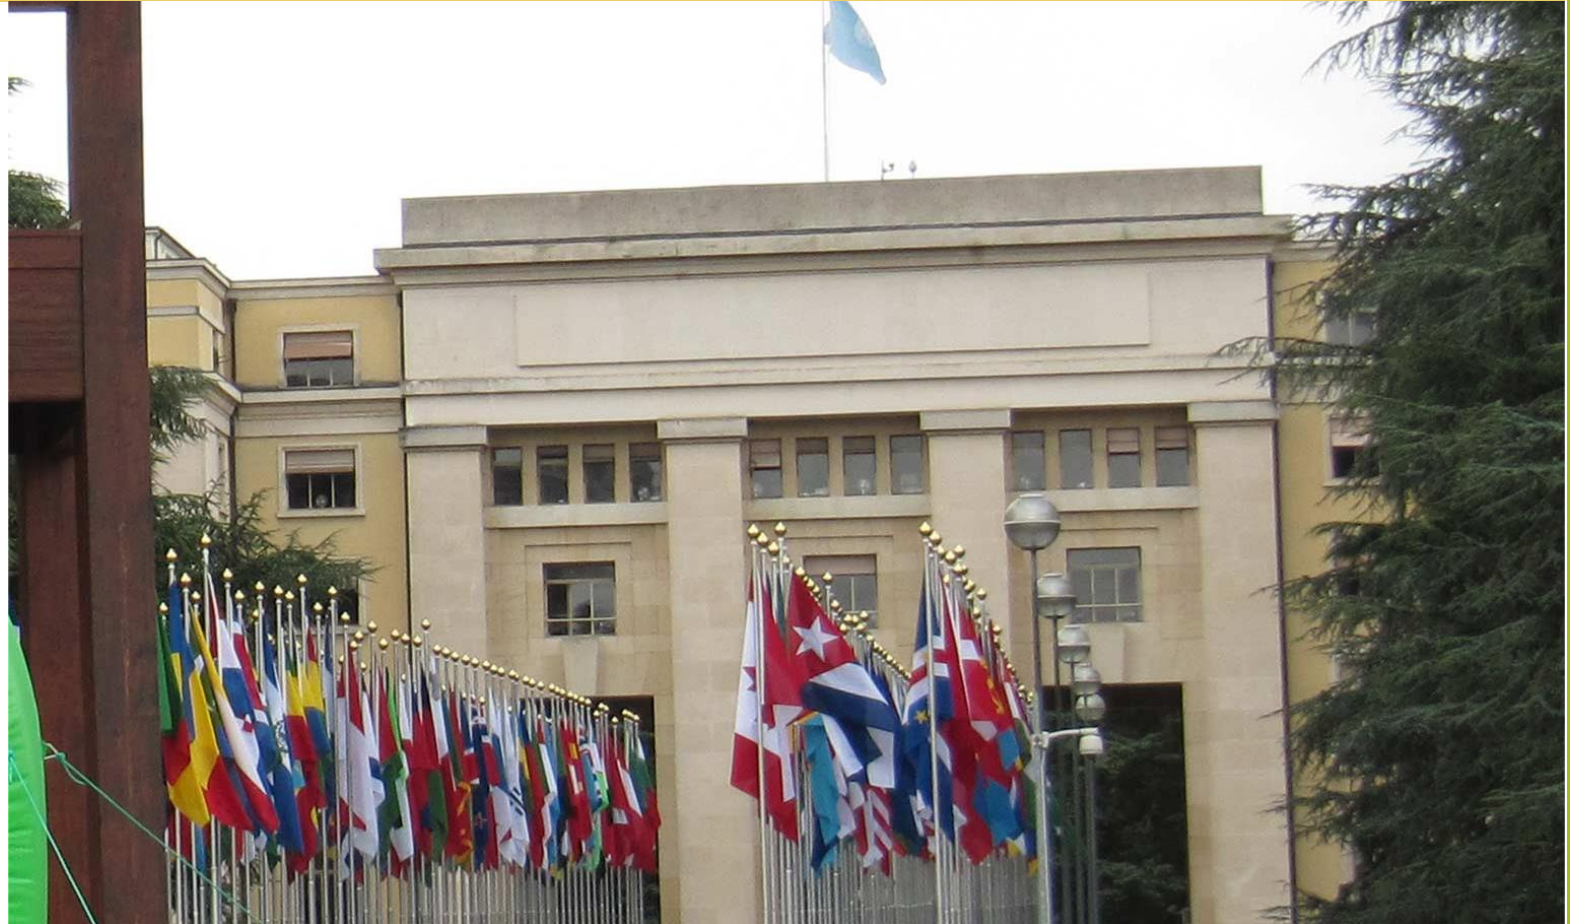

Advanced vehicles like electric cars and bicycles will collect at your school. The cards will be transported by ship to Bremerhaven, Germany

What will happen then?

1. On the 7th of June of this year 100 electric vehicles will pick up the cards in Bremerhaven.
2. These electric vehicles will transport 1,000,000 commitments to United Nations in Switzerland to deliver one powerful message.
3. On the 17th of June, 2016 these 1,000,000 cards will be laid-out on the Place des Nations in Geneva, Switzerland
4. This is to create the world's largest greeting card mosaic to enter Guinness Book of Records.
5. The whole mosaic will be photographed with a drone, and every child will be able to find his/her card amongst hundreds of thousands of others online on www.wave.earth

Do this now?

Write your card!
Be part of the solution!
Be part of this WAVE project!

We will help you to organize the
electric vehicles!

Louis Palmer
founder of WAVE
Awarded "Champion of the Earth 2011" for
circumnavigating the globe two times with
solar powered, electric vehicles, says
*"For the sake of humankind, our planet
and future generations, we can show the
direction for a new way forward."*

What is WAVE?

WAVE is a community of concerned teachers, parents, electric vehicle owners, scientists, engineers and more. We are based all over the world and everyone can join us.

www.wave.earth

WAVE is a people's movement offering practical environmentally sustainable actions following the 2015 Paris agreement on climate change. These actions include organising the largest electric vehicle rally in the world to promote green transport & renewable energies.

Let's move the world, together!
